

Pediatric Wellness & Art Day

KIMSHEALTH Medical Center, Bur Dubai hosted a **Pediatric Wellness & Art Day** on 2 August 2026, creating a warm and engaging environment where children could experience healthcare as a positive, friendly, and supportive part of growing up.

At KIMSHEALTH, we believe that **every child deserves a first friend in healthcare**—someone they can feel comfortable with, trust, and turn to at every stage of their wellbeing. Through initiatives like this, we aim to build that connection early and make healthcare experiences more welcoming for children and their families.

The event featured a **Magic Drawing Competition** for children below 15 years, encouraging creativity, confidence, and joyful participation. Alongside the activities, a **complimentary Vitamin D test** was offered to the mothers of the first five registered children, promoting preventive health awareness and the importance of family wellness.

The day also marked the **launch of the Vaccination Card**, highlighting the importance of keeping children's immunization records organised and supporting parents in maintaining a structured approach to pediatric preventive healthcare.

More than an event, the Pediatric Wellness & Art Day reflected KIMSHEALTH's commitment to being **there for every child's wellbeing—from their first healthcare experience and beyond**. By bringing together health awareness, preventive care, creativity, and family engagement, KIMSHEALTH Medical Center continues to build lasting relationships with children and families in Dubai.
